Strategies for improving reproducibility

Professor Marcus Munafò
Nathalie Percie du Sert
Strategies for improving reproducibility

- Research quality
- Incentive structures
- Open research
- UK reproducibility Network
- Are there any obvious gaps?
- What are the barriers preventing change in practice and how can they be addressed?
- We can measure uptake of these initiatives but how to assess impact?
Strategies for improving reproducibility

• No one strategy for improving reproducibility
• Need to address at multiple levels of the system
• Encouraging students and early career researchers to adopt reproducibility practices
• Providing senior support and networks
