

## BioArtAttack Competition 2014

### Cheek Cells

Neo Eden, Jeremy Yuen, Annie Morris, Kalina, Vasil and Abdul (Whitefield School)

Shortlisted for the 11-18 category

*“Students created ceramic versions of their cheek cells. First they swabbed the insides of their cheeks, and created their own microscope slides and viewed their cheek cells using light microscopes. They then drew diagrams of these images. Finally, they used glass, clay and different coloured dyes to create their own ceramic cells.”*
